

Developing your Workforce in 2023

Construction Supervision Fundamentals (CSF)

Construction Supervision Fundamentals (CSF) is designed specifically to meet the needs of the learner, as well as the construction industry. Developed, updated, and field tested by contractors for contractors, this course focuses on the knowledge, skills and attitudes required for effective construction supervision. It is especially appropriate for those who are new supervisors, newly promoted foremen, or for anyone who seeks career advancement in leading and directing.

The CSF course is a highly interactive first step on the path to developing construction supervisors. This course presents nine foundational skills of successful supervisors:

- Team Management
- Project and Team Leadership
- Communication Skills
- Time Management and Project Scheduling
- Risk Management
- Construction Law and Contract Documents
- Problem Resolution
- Productivity and Cost Control
- Skills Development

The 25-hour course, held over three days, focuses on nine topics and includes case studies and group activities. It also provides jobsite exercises for continued skill development. **Who should take this course:** Aspiring front line leaders who are looking to learn entry level management skills to lead construction activities.
